

MoreSense - Product Introduction

IOT Communication and
Radar Sensing Module Provider

Shenzhen MoreSense Technology Co., Ltd.

Shenzhen MoreSense Technology Co., Ltd., headquartered in Shenzhen, China, is a company that integrates R&D, production and sales to provide customers with radar sensing module and IOT communication total solutions.

The products cover 5.8G, 10G, 24G microwave/millimeter wave radar modules, WiFi/BLE and other wireless communication modules and supporting software solutions.

MoreSense has been deeply cultivating the industry for many years, serving many famous customers in the markets of smart lighting, smart home appliances, smart security, smart home, etc., with a shipment volume of 1 million pieces per month.

MORESENSE

01

RADAR SENSING MODULE

MMRADAR - BASIC PRINCIPLES AND APPLICATIONS

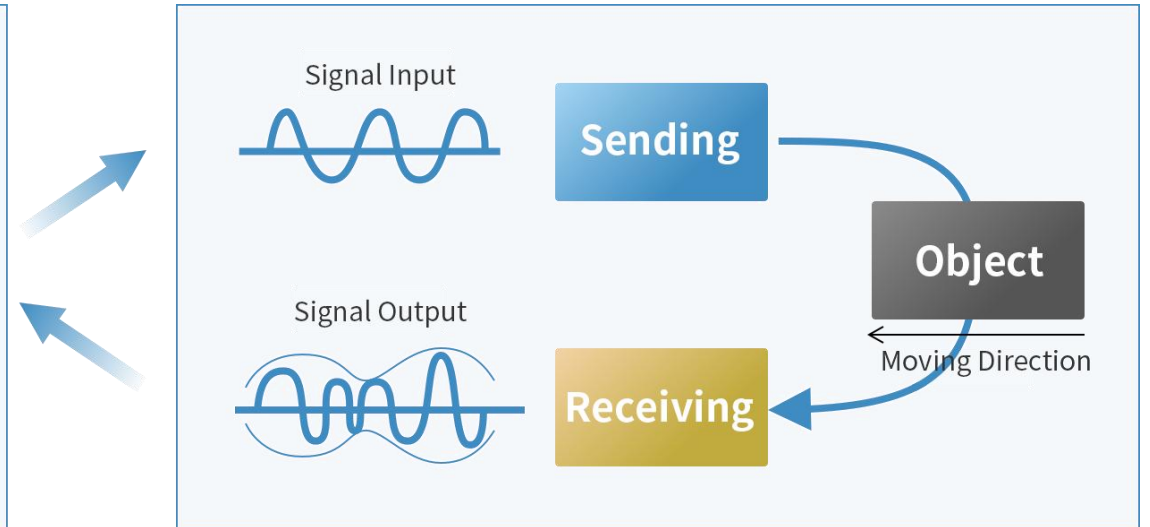

1. Radar is an electronic device that uses electromagnetic waves to detect objects.

2. The radar module detects the frequency difference between the transmitted and received signals by transmitting and receiving high-frequency electromagnetic waves and Doppler principle, which can be used to judge whether there are moving objects in the area.

3. It can be used to detect the presence of human body or various scenes of moving target induction, such as intelligent lighting, smart security, smart home, home appliances, access control, medical treatment.

Integrated patch antenna

Radar perceives objects by emitting electromagnetic waves, and then uses the reflection of objects to process and judge the information.

COMPARISON - MORESENSE 5.8G RADAR VS. INFRARED SENSOR

Item#	Infrared Sensor	MoreSense 5.8G Radar Sensor
Product Structure	There will be needed for a opening hole and lenses on structure	There will not be needed for a openingholeand can be installed concealed
Temp. Characteristics	Be sensitiveabout Temp.,easily triggered or failed in summer or outdoors	Sensing characteristics are not affected by ambient temp.
Light Characteristics	Performance will be affected by strong light or light intensity changes	Unaffected by light
Consistency	Poor consistency.Due to environmental influence	Good consistency.Single IC solution,andit willnot affected by environment
Sensing Distance	Small sensing range,3~5m	Large sensing range,1~30m
Sensitivity	Not high sensitivity,weak radial sensitivity	High sensitivity,adjustable at the same time
Power Consumption	<70uA,support to be battery powered	Low power version 29uA,battery powered
Dust	Affected by dust obstruction	Unaffected by dust obstruction

Comparison-Traditional 3G Radar Module,Discrete 5.8G,10G Radar Module VS. MoreSense 5.8G Radar Module

Item#	Traditional 2.4-3.9G Radar Module	Discrete 5.8G Radar Module	MoreSense 5.8G Radar Module	10G Radar Module
Volume	Small	Large&complex structure	Small	Small
Consistency	Poor	Poor Based on a hybrid integration scheme	Good Based on SoC solution	Good Based on SoC solution
Anti-Interference Ability	Poor easy to self-excite and ineffective	Poor easy to self-excite and ineffective	Good Single-chip solution. Using PLL frequency locking technology + random frequency when power-on,	Good Single-chip solution.Using PPL freq. locking technology+ random freq when power-on
Temp. Characteristics	Poor The frequency changes significantly with temp.	Poor The frequency changes significantly with temp.	Using PLL frequency locking technology,the frequency hardly changes with temp.	No freq. lock,easy to change temp.
Sensing Distance	1~12m	1~12m	1~30m	1-10m
Sensing Angle	360°	120°	120°	About 120°
Power Consumption	High power consumption,can not be battery powered	High power consumption,can not be battery powered	Low-power version achieves 40uA, battery-powered	Low-power version achieves 50uA, battery-powered
Certification	Unable to pass wireless certification, high harmonic content	Difficult to pass certification	Comply with FCC/CE/RS/SRRC and another wireless certification standards	Not support to pass SRRC,support to pass KC,TELEC,FCC...
Cost	Low cost with many electrical components	High cost	Low cost	Low cost

5.8G LOW-COST MICROWAVE RADAR MODULE

Module Features

Positioning lighting products routine needs, using low-cost radar chip, extreme cost-effective, optional light sensor function, can output PWM.

Module Parameters

-  Working Frequency Band: 5725~5875MHz
-  Sensing Distance Range:
Assembly height 3 meters, radius 3-4 meters
-  Supply Voltage: DC3.3~12V
-  Power Supply Current: 9mA
-  Size: 20*20mm

MS58-2020D9M4

Ceiling Light

Bulb Light

Down Light

Lamp

5.8G HIGH PERFORMANCE MICROWAVE RADAR MODULE

Module Features

High-performance SOC chip solution, support 2nd development and complex algorithms, stronger anti-interference ability; FMCW algorithm provides ranging assistance to make the sensing distance boundary clearer;
Ultra-small size SMD package, can do 0~15 meters motion sensing, can also be customized according to the application requirements to increase the micro-motion algorithm, multi-segment sensing logic to enhance the user experience.

Module Parameters

-  Working Frequency Band: 5725~5875MHz
-  Sensing Distance Range:
Adjustable 0~15 meters in diameter
-  Supply Voltage: DC3.3V/5V/12V
-  Power Supply Current: 20mA
-  Size: 14*17.2mm

MS58-14172S20M4

Panel Switch

Mirror Light

Air Conditioner

Toilet Lid

5.8G LOW POWER MICROWAVE RADAR MODULE

Module Features

The industry's lowest power consumption of 29uA, battery-powered use, instead of the current PIR, infrared tube and other human body sensing program.

Module Parameters

-  Working Frequency Band: 5725~5875MHz
-  Sensing Distance Range:
0.5 meters~10 meters
-  Supply Voltage: DC3.3V or 5~12V
-  Power Supply Current: 29uA
-  Size: 20*20mm

MS58-2020D13M4

Door Lock

Camera

5.8G HUMAN PRESENCE INDUCTION MICROWAVE RADAR MODULE

Module Features

Based on the 5.8G solution to achieve motion, micro-motion, breathing multi-dimensional judgment which determine whether someone more accurately. FMCW algorithm support to provide range measuring assistance which can be better to avoid false triggers and interference outside the set range, 5.8G human presence detection is mainly focus on cost-effective solution.

Module Parameters

-  Working Frequency Band: 5725~5875MHz
-  Sensing Distance Range:
Assembly height 3m , radius 3m (breathing detection)
-  Supply Voltage: DC3.3V/5V/12V
-  Power Supply Current: 20mA
-  Size: 20*20mm

MS58-2020D20M4-LIVE

Human Presence Sensor

Desk Lamp

Smoke Alarm

5.8G HAND SWEEPING INDUCTION MICROWAVE RADAR MODULE

Module Features

Based on 5.8G cost-effective chip solution, can do close distance hand waving induction or 1~2 meters wake up when objects close to the product, can support PWM output, on-off mode, low-power version of 29uA can support battery-powered

Module Parameters

-  Working Frequency Band: 5725~5875MHz
-  Sensing Distance Range:
10~50cm adjustable for hand sweeping induction
-  Supply Voltage: DC3.3V/5~12V
-  Power Supply Current: 13mA/29uA
-  Size: 20*20mm

MS58-2020D13M4

Cabinet Light

Intelligent Toilet Kick Switch

Panel Switch

5.8G HIGH ALTITUDE OR LONG DISTANCE MICROWAVE RADAR MODULE

Module Features

Integrated LNA chip on the module, while optimizing the algorithm to enhance anti-interference and exclude common false triggering, the max. sensing distance up to 30 meters.

Module Parameters

-  Working Frequency Band: 5725~5875MHz
-  Sensing Distance Range:
Assembly height 15 meters or straight line distance 30 meters
-  Supply Voltage: DC3.3~12V
-  Power Supply Current: 34mA
-  Size: 20*20mm

MS58-2020D20M4-LNA

Industrial and Mining Lamp

Wall Lamp

Street Lamp

Garden Light

10G HIGH COST-EFFECTIVE MICROWAVE RADAR MODULE

Module Features

It adopts 10.525G fixed frequency low-cost radar chip, which can support PWM output, on-off mode, and the low-power version 51uA can support battery power supply.

Module Parameters

- Working Frequency Band: 10500~10550MHz
- Sensing Distance Range:
Adjustable 0~10m in diameter
- Supply Voltage: DC3.3~12V
- Power Supply Current: 51uA/26mA
- Size: 20*20mm

MS10-2020D26M4

Cabinet Light

Footer Lamp

Table Lamp

Entrance Lamp

10G LOW POWER MICROWAVE RADAR MODULE

Module Features

Extremely small size 22*11mm, with limit holes, wiring holder, flexible to adapt to a variety of compact structure, low power consumption 51uA which can support battery power, can support stay auxiliary detection.

Module Parameters

-  Working Frequency Band: 10500~10550MHz
-  Sensing Distance Range:
Adjustable 0~5 meter in diameter
-  Supply Voltage: DC3.3V
-  Power Supply Current: 51uA
-  Size: 22*11mm

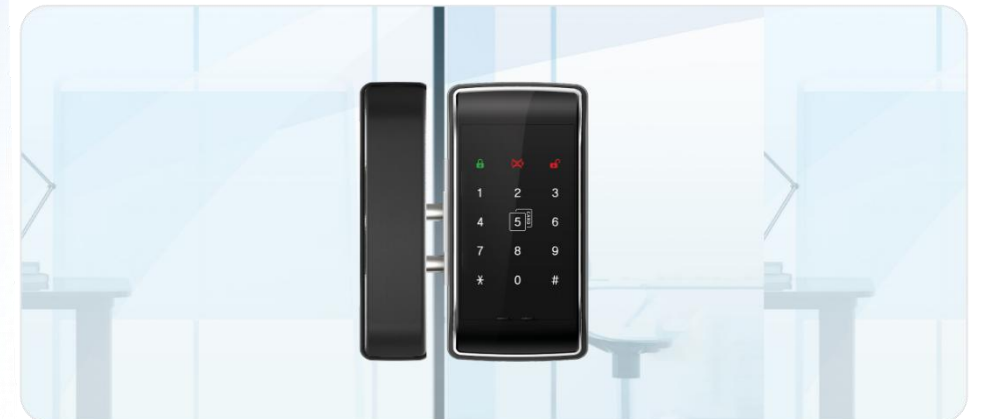

MS10-2211J26M4

Intelligent Door Lock

Visual Doorbell

Glass Door Lock

10G HAND SWEEPING INDUCTION MICROWAVE RADAR MODULE

Module Features

Extremely narrow edge 7mm, flexible adaptation of compact structure, hand sweeping solution can be done at the shortest distance of about 10cm, fast response, accurate distance, and in excess of the range of no false touch, can penetrate the thin wood panels, acrylic, glass and other products except metal material.

Module Parameters

-  Working Frequency Band: 10500~10550MHz
-  Sensing Distance Range: 10cm~30cm
-  Supply Voltage: 3.3V or 5~12V
-  Power Supply Current: 51uA/26mA
-  Size: 38*7mm

MS10-3807S26M4

Appliances with Screen

Panel Switch

Hood

Cabinet Light

24G MICRO-MOTION DETECTION MILLIMETER WAVE RADAR MODULE

Module Features

Low-cost and based on CW mode to realize motion and micro-motion detection. Compared with 5.8G, the back side has the shorter sensing distance, does not penetrate the wall, sensing range deviation is smaller, anti-interference performance is good.

Module Parameters

-  Working Frequency Band: 24000~24250MHz
-  Sensing Distance Range:
Micro-movement of assembly height 3 meters,
sensing radius is 2.5 meters
-  Supply Voltage: DC5~12V
-  Power Supply Current: 62mA
-  Size: 20*20mm

MS24-2020D58M4

Human Presence Sensor

Mirror Lamp

Table Lamp

24G HUMAN PRESENCE INDUCTION MILLIMETER WAVE RADAR MODULE

Module Features

Based on the 24G radar chip solution to achieve motion, micro-motion, breathing multi-dimensional and more accurate detection of the presence of the human body, FMCW algorithm to support ranging, you can better avoid false triggers and interference outside the set range, support UART to adjust the parameters.

Module Parameters

-  Working Frequency Band: 24000~24250MHz
-  Sensing Distance Range:
Assembly height 3 meters and the sensing radius is 2 meters (breathing detection)
-  Supply Voltage: DC3.3~5V
-  Power Supply Current: 63mA
-  Size: 30*16mm

MS24-3016D63M4

Human Presence Sensor

Smoke Alarm

TV

24G SPATIAL POSITION PRESENCE DETECTION MILLIMETER WAVE RADAR MODULE

Module Features

One signal transmitter and two signals receivers antenna design, can support breathing detection, distance measurement, angle measurement, so as to realize the position detection of human body. Through the application layer data processing, it can realize specific interference target filtering, sub-area linkage control, gesture recognition, human body trajectory and so on.

Module Parameters

-  Working Frequency Band: 24000~24250MHz
-  Sensing Distance Range:
7 meters in diameter of movement detection,
5 meters in diameter of breath induction
-  Supply Voltage: DC5V
-  Power Supply Current: 145mA
-  Size: 32*22mm
-  Angle Precision: ± 10

MS24-3222GH145M4

Human Presence Sensor

Intelligent Toilet

Air Conditioner

TV

24G PARKING DETECTION MILLIMETER WAVE RADAR MODULE

Module Features

Based on the 24G radar chip solution to realize accurate ranging, low-power consumption applications, to realize parking space detection, and to circumvent false triggering and interference outside the set range.

Module Parameters

-  Working Frequency Band: 24000~24250MHz
-  Sensing Distance Range:
6 meters in diameter
-  Supply Voltage: 3.2-5.5V
-  Power Supply Current:
1mA average current (one second detecti
-  Size: 25*25mm
-  Accuracy: +/-0.2m

Parking Space Detection

Intelligent Parking Space Lock

RADAR + DIP SWITCH

Module Features

MoreSense Radar + X series module, the module integrates 4-position dip switches for sensing distance, time and light-sensitive adjustment functions, users adjust the distance and other parameters according to their own use of the environment through the dial code.

Module Parameters

-  Working Frequency Band: 5725~5875MHz
-  Sensing Distance Range:
Assembly Height 3 meters, sensing radius 3-4 meters
-  Supply Voltage: DC5~12V
-  Power Supply Current: 9mA
-  Size: 38*20mm

RADAR + INFRARED REMOTE CONTROL

Module Features

MoreSense Radar + X Series Module, through the infrared remote control to set the radar sensing distance, output time, light sensor switch and PWM duty cycle and other parameters.

Module Parameters

-  Working Frequency Band: 5725~5875MHz
-  Sensing Distance Range:
Assembly Height 3 meters, Sensing Radius 3-6 meters
-  Supply Voltage: DC5~12V
-  Power Supply Current: 9mA
-  Size: 22*20mm

RADAR + BLE / ZIGBEE NETWORKING

Module Features

MoreSense radar + X series module, radar sensing + BLEMESH networking combination, designed to avoid the mutual interference of radar and IOT module, you can set the microwave radar sensing parameters and realize group control through APP.

Module Parameters

-  Working Frequency Band: 5725~5875MHz
-  Sensing Distance Range:
Assembly height 3 meters, sensing radius 3-5 meters
-  Supply Voltage: DC5~12V
-  Power Supply Current: 20mA
-  Size: 34*23mm

IOT Communication Module

WIFI & BLE COMBO MODULE (BEKEN IC SOLUTION)

MSWBT2213

Dual mode, support BLE distribution network, AP distribution network, small program and other kinds of distribution network, excellent antenna performance, support a variety of software development customization needs, can connect private cloud, Amazon, Ali IOT, Tencent IOT and so on. Applied to small home appliances, smart locks, blood pressure monitors, electronic scales and so on.

🌀 Module Type: WiFi 2.4G & BLE

📶 WiFi Protocol: 802.11b/g/n

🔗 BLE Protocol: BLE5.2

📡 Main Frequency: 120Mhz

📍 SRAM: 256KB

📏 Size: 22*13mm

Intelligent Door Lock

Blood Pressure Monitor

WIFI & BLE COMBO MODULE (ESP32 IC SOLUTION)

MSWB2213

Dual mode, support BLE distribution network, AP distribution network, small program and other kinds of distribution network, excellent antenna performance, support a variety of software development customization needs, can connect private cloud, Amazon, Ali IOT, Tencent IOT and so on.

- Module Type: WiFi 2.4G & BLE
- WIFI Protocol: 802.11b/g/n
- BLE Protocol: BLE5.2
- Main Frequency: 160Mhz
- SRAM: 400KB
- Size: 22*13mm

Air Purifier

Thermostat

DUAL-BAND WIFI 6 & BLE COMBO MODULE

MSWXB2522

WiFi6, dual-frequency and dual-mode, support BLE distribution network, AP distribution network, excellent antenna performance, support a variety of software development customization needs, connecting private cloud, Amazon, Ali IOT, Tencent IOT and so on. Applied to energy storage devices, smart locks, massage chairs and so on.

- Module Type: Dual-band WiFi 6 & BLE
- WIFI Protocol: 802.11b/g/n/ax@WiFi6
- BLE Protocol: BLE5.0
- Main Frequency: 480Mhz
- SRAM: 992KB
- Size: 25*22mm

BLE 5.3 ULTRA SIZE MODULE

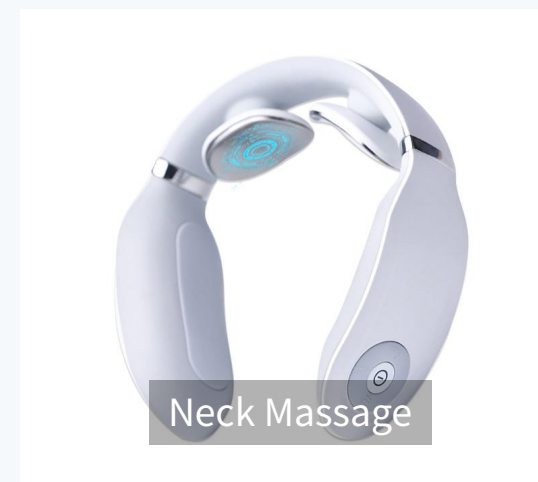

MSJBT1610

The industry's ultra-small size module, excellent antenna performance, UART transmission, support a variety of software development customization needs, support a variety of certifications. Applied to personal care products, sports health, small household appliances, sharing devices, etc..

- Module Type: BLE
- BLE Protocol: BLE5.2
- Main Frequency: 96Mhz

- SRAM: 73KB
- Size: 16*10mm

BLE 5.3 HIGH PERFORMANCE MODULE

MSJBT2213

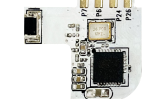

Rich pin resources, excellent antenna performance, UART transmission, support for a variety of software development and customization needs, support for a variety of certifications. Used in security access control, time and attendance machine, industrial control, etc..

- Module Type: BLE
- BLE Protocol: BLE5.2
- Main Frequency: 96Mhz

- SRAM: 73KB
- Size: 22*13mm

Radar Solar Monitoring Garden Light Module — Overall Solution

The radar solar monitoring garden light module solution launched by MoreSense which has the functions of monitoring and controlling through small program, and at the same time it supports radar human body sensing, WiFi & BLE networking function, camera monitoring, real-time intercom, intelligent dimming, etc , . The innovation of this solution is to meet the demand for energy-saving lighting of consumer's yard, and at the same time it supports the functions of smart sensing, smart monitoring, and smart lighting, and has the advantages of wireless transmission, easy wiring installation, and low cost.

- 
 WI-FI Remote Monitoring
- 
 Radar Sensing
- 
 Intelligent Lighting
- 
 Solar Energy Storage
- 
 Outdoor Anti-Interference

Video Parameters	Effective Resolution	1600*1200 (2MP)
	Video Frame Rate	15fps
	Video Stream	135kbps-2048kbps
	Minimum Illumination	Day Mode 300Lux,Night Mode 100Lux
	Day-Night Mode	Automatic Mode
Electrical Parameters	Working Voltage	3.3V
	Working Current	150mA ± 10mA
	Working Environment	-10°C --- 50°C
Network Protocols		802.11 b/g/n@WIFI4
